1. Idea Submission (Employee-Centric, Low Friction)

Objective

Maximize participation by minimizing initial effort.

Employee Input Fields (Only Basic Details)

- Idea Title / Short Description
- Department (Auto Fetch From Drop Down)
- Unit (Auto Fetch From Drop Down)
- Area / Location (Standardized dropdown: OP, IP, ER, ICU, OT, etc.)
- Expected Benefits (Productivity / Quality / Cost / Delivery / Safety / Environment / Morale – PQCDSEM)
- Optional attachment (image / document)

Constraint:
Employees must NOT see the full Kaizen template at this stage.

System Behavior

- Generate **Idea Reference ID** (not Kaizen Number).
- Auto-assign idea to the respective **Unit Coordinator**.
- The employee dashboard shows status only (Submitted / Approved / Rejected / In Progress / Rewarded).

2. Unit Coordinator – Idea Validation Gate

Role Responsibility

- First-level screening for relevance, feasibility, and duplication.

Actions Available

- Approve Idea
- Reject Idea (mandatory remarks)

System Logic

- If rejected → notify employee with remarks.
- If approved → route to **Selection Committee**.
- Lock employee editing after submission.

3. Selection Committee – Ownership & Implementation Assignment

Responsibilities

- Decide *who* should implement the idea.

UI Requirements

- Show **Department Name first**
- Dropdown to select:
    - Responsible Department
    - Implementer (mapped employee list)

Controls

- Only **Actions** and **Status**
- No template editing here

Outcome

- Assign Implementer
- Notify Implementer and Idea Originator

4. Implementer – Kaizen Execution Using Standard Template

Key Requirement

The implementer must complete the **full Kaizen Template** (based on the attached image).

Template Sections (Digitized Exactly as per Image)

- Title / Theme (auto-filled from Idea)
- Category (Clinical / Non-Clinical)
- Unit, Area, Dates
- Kaizen Number (generated only after BE approval)
- **Problem / Present Status**
    - What / Where / When / How / How Much
- **PQCDSEM Impact Selection**
- **Standardization**
    - OPL / SOP / Manual / Others
- **Before vs After** (with image upload)
- **Why–Why Analysis**
    - Max **10 words per Why**
- Root Cause
- Idea to Eliminate

- Countermeasures (file upload enabled)
- Horizontal Deployment (Yes/No + description)

System Controls

- Auto-populate:
    - Kaizen Theme
    - Idea Reference
- Enforce word limits and mandatory fields.
- Fix and ensure the Submit **Implementation Report** works reliably.

5. Unit Coordinator – Post-Implementation Verification

Responsibilities

- Validate implementation quality.
- Decide approval routing.

Manual Routing Options

- Quality
- HR
- Finance *(Mandatory if cost saving > ₹5 Lakhs)*
- One or multiple departments selectable

System Logic

- Based on selection, route to respective HOD dashboards.

6. Functional HOD Review (HR / Finance / Quality)

Capabilities

- Review Kaizen details
- Approve or Reject with remarks

Rejection Handling

- On rejection → workflow automatically returns to **Unit Coordinator**
- Maintain rejection history and audit trail

7. Business Excellence (BE) Evaluation & Governance

Responsibilities

- Cost-benefit analysis
- Business impact validation
- Reward recommendation

System Actions

- Generate official **Kaizen Number**
- Define:
    - Cost savings
    - Qualitative benefits
    - Reward amount
- Approval by **BE Head**

8. Reward Processing & Closure

Post BE Approval

- Workflow routed to:
    - Unit HR
    - Unit Coordinator

Reward Management

- Mark payment status:
    - Paid / Pending
- Record payment reference
- Notify:
    - Idea Originator
    - Implementer

9. Role-Based Dashboards (Dynamic & Secure)

Role	Dashboard View
Employee	Own ideas & rewards
Unit Coordinator	Unit-wide ideas & approvals
Selection Committee	Enterprise idea pool
Implementer	Assigned Kaizens
HODs	Pending functional approvals
Business Excellence	Impact analytics & rewards
Admin	Configuration & master data

Design and build a scalable, role-driven Kaizen & Continuous Improvement (CI) Management Platform that enables structured idea capture, disciplined Six Sigma governance, transparent approvals, measurable business impact, and reward management. The platform must support thousands of users across multiple units, enforce Kaizen methodology, and ensure audit-grade traceability.

we will be receiving close to 1000+ idea so design the application accordingly and use the following color code and fix the legibility issues.--kauvery-purple: #962067;
--kauvery-violet: #A23293;
--kauvery-pink: #EE2D67;
--kauvery-yellow: #FFE73F;
--kauvery-dark-grey: #58595B;
--kauvery-red: #EC1D25;
--kauvery-orange: #F26522;
--kauvery-yellow-orange: #FDB913;
--kauvery-peach: #FAA85F;
--kauvery-light-grey: #939598;

improve readability and fix the issue with dark backgrounds on input fields, I will explicitly set high-contrast colors (white background, dark text) on all form elements and enhance the overall color palette for better legibility.Add a new section or button within the Kaizen detail view that, when clicked, calls the suggestImprovements function from geminiService.ts using the idea's title. Display the AI-generated improvement tips to the user, perhaps in a collapsible panel below the main details.

All suggestions The workflow should be like employee should be giving suggestions he just need to fill in the basic details, Like, Idea, Unit, Area / Location, Department,Expected Benefits. Then this idea is validated by the Unit Coordinator. The unit coordinator evaluates the idea and makes decision to approve or reject the Idea. Once the Idea is approved, It will be further sent to the Selection committee to decide who will be responsible/suitable team or department for implementation of this Idea. Once it's assigned to the respective person who has been selected to implement the idea, he has to fill in the details using the given Kaizen template and as a proof which indicates that he has successfully implemented the Kizen. Once he implements and submits the kaizen template, it goes to the Unit Coordinator, where he has to verify and process it to next level of approval: for which he needs an manual selection option to send: Eg.Quality or Finance (Condition: only if greater than 5 Lakhs) or HR or can select all the departments. As a next step the concern department HODs need to have a provision to review and approve the list. Then there will be an cost and business impact evaluation done by Business Excellence team where they will decide on the reward amount and will be approved by the Business Excellence team HOD. Then it should go to HR team and Unit coordinator for processing the reward and an intimation will be sent to the Employee who gave the idea as well as who implemented the Idea.

- Area Location should be updated as OP/IP/ER, Etc
- All suggestion - Unit coordinator - Remove other options and have Only the Actions and Status
- After Approval/Rejection in the same page with remarks the Concern employee should view the status with notification
- Executive overview dashboard need to be changed dynamically based on the role Example: Employee should who gives ideas need only view the Employee dashboard, Unit Coordinator should view all the employee Ideas, Selection committee should view all the employee Ideas, etc.

- Workflow Board need to be changed dynamically based on the role Example: Employee should who gives ideas need only view the Employee dashboard, Unit Coordinator should view all the employee Ideas, Selection committee should view all the employee Ideas, etc.
- In selection Committee Remove other options and have Only the Actions and Status and first add the Department name with that add dropbox of the respective Department Employees name
- Implementer - Remove other options and have Only the Actions and Status and in Fill implementation report add automatically the kaizen theme and kaizen sheet in the counter measure add provision box to add files
- Enterally Ideas Number need to be carried out after Business Excellence approval Kaizen Number need to be generated
- In Why-Why - Restrict the words to maximum 10 words
- As per the kaizen template generate the kaizen sheet
- After filling the kaizen sheet submit implementation report button is not working
- Give provision of approval and rejection to Head HR, Head Finance and Head Quality for checking, give provision to rejection once rejected it need to be triggered to the unit coordinator
- Once approved by the Business Excellence Head it need to be triggered to the unit coordinator and Head HR
- After reward approved by Business Excellence Head give provision to unit HR and Unit coordinator to mark the payment status

9. Role-Based Dashboards (Dynamic & Secure)

Role	Dashboard View
Employee	Status for Approval & Remarks
Unit Coordinator	Unit-wide ideas & approvals
Selection Committee	Enterprise idea pool
Implementer	Assigned Kaizens
HODs	Pending functional approvals
Business Excellence	Impact analytics & rewards
Admin	Configuration & master data
